

PC Power Management Rebates

Know your power to conserve energy and cut expenses by ensuring that your organization's computers are turned off when not in use.

GET SAVINGS WITHOUT DISRUPTING YOUR SYSTEM

When computers are left on at night and on the weekends, your organization is losing money. PC power management software offers a networked approach to powering down your computers without interfering with the needs of the user or information technology staff.

Our energy experts can help answer your questions about which software will work best with your system. With proper installation of an approved software package, Tacoma Power can provide a one-time rebate of \$8 per computer, and you'll be saving energy year after year.

LOCAL BUSINESSES SAY ...

"Tacoma Power has provided DSHS rebate funds from its PC Power Management program to support our Resource Conservation Management program. Thanks to Tacoma Power, our agency is saving energy on our computers, and together our partnership contributes to a statewide, comprehensive energy conservation effort."

John Pelkey, Washington State Department of Social and Health Services
