

## POWER MOVE #58

# Getting ~~\$500~~ \$750 to install a new water heater.

[For a limited time, get an extra \$250 off.]

### A smarter way to heat your water.

When you replace your electric water heater with a hybrid model, you're saving in two ways: You're using less energy thanks to super-efficient heat pump technology, and saving on utility bills from reducing your hot water costs by as much as 60%. Considering that heating water is often the second-highest source of home energy use, that's a pretty big deal.

For a limited time, you can get **\$750** off the price of a hybrid water heater. This extra \$250 savings is available on approved models purchased at The Home Depot or Lowe's before Dec. 31, 2023.

**Use less. Save more. Get \$750 back.  
It's almost too good to be true.**

### 🔽 OTHER POWER MOVES TO PULL OFF:

- **Deferred loans** on heating and cooling systems, windows and more—where you owe nothing until you sell your home.
- **Rebates** on heat pumps, smart thermostats, and more.
- **Contractor discount** up to \$2,000 on a new heat pump.

See what you qualify online or call 253-502-8363.
