#### Clean Energy Implementation Plan (CEIP)

INDICATORS TO TRACK EQUITY

#### Norms

Video on when you can

Engage in the conversation

If you need to step away use "BRB"

Use emojis/reactions to encourage fellow participants

Use the chat feature if you have a question you don't want to forget

Call on the next person to "fill" silence

Don't need to introduce self every time now that we have names

Use the raise the hand button if you have a question or comment

Speaking slowly & avoiding acronyms when possible

Get to content faster

Use the annotate feature if pointing out specific feature on PPT Step up, step back – embrace silences and pause so others can share Using "small groups" in Zoom can make conversations more comfortable Use the word S T A C K to denote queue in the chat Hosts mute guests who forget they're not on mute Background blurring Zoom makes meetings more accessible

#### Ice Breaker

Change your "Zoom name"

- Right click on your name in the bottom right of your video
- Click "rename"
- Add your first and last name & the company you work for

Breakout Room 1:1

- What is your name?
- What is your company?
- What is your favorite "Zoom rule"?
- Decide who will share your agreed upon "Zoom rule"

## Objective

- 1. Introduce the Clean Energy Implementation Plan
- 2. Get input on indicators used to take equity into consideration for the CEIP

### What is the CEIP?

Each utility must submit by January 1, 2022, and every four years thereafter, a CEIP using a form provided by the Department of Commerce. The utility must provide opportunity for public input on the CEIP and must be adopted by the utility's governing body.

#### It's a new requirement

- Introduced in Clean Energy Transformation Act (CETA)
- Details on how to complete the plan guided by Department of Commerce rulemaking for CEIP

#### It's a four-year plan

- Purpose is to ensure utilities are preparing to comply with CETA requirements that start in 2030
- Updated every four years starting in January 1, 2022

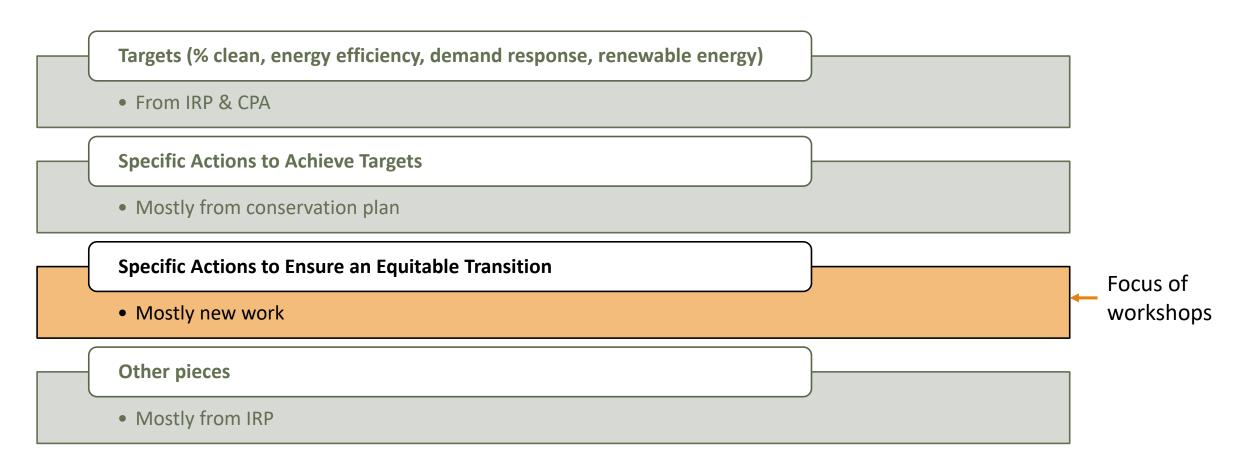

#### It's internally consistent

 It is expected to be consistent with other utility planning document (IRP, CPA, etc.)

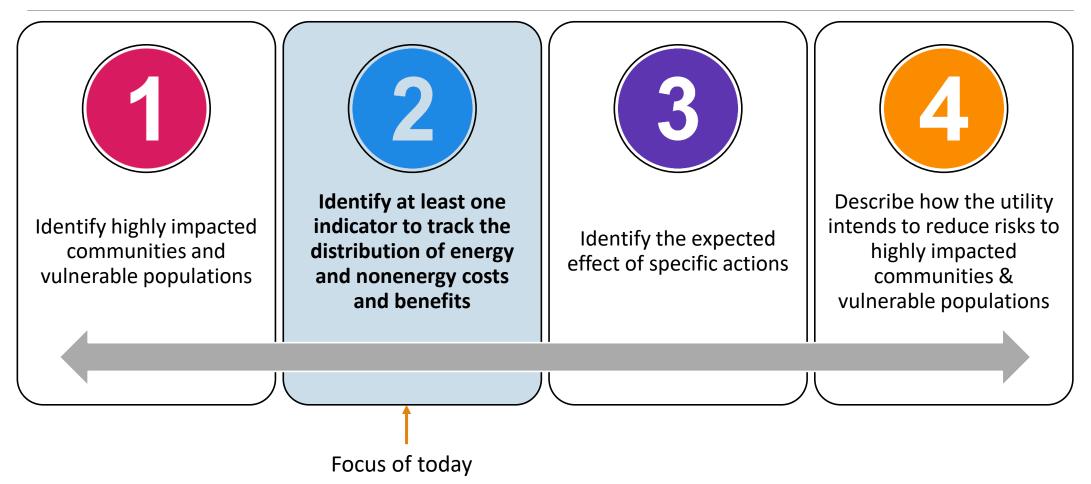

#### It's a plan and not a compliance document

• No penalty for changes to the plan if our situation changes

### What goes into the CEIP?

## What goes into ensuring an equitable transition?

## How did you come up with a shortlist of indicators?

#### Brainstorm

Criteria to narrow down brainstorm list to long list of "good indicators" Internal discussion to narrow down to shortlist of most relevant and appropriate indicators

# What criteria are we using to pick "good" indicators?

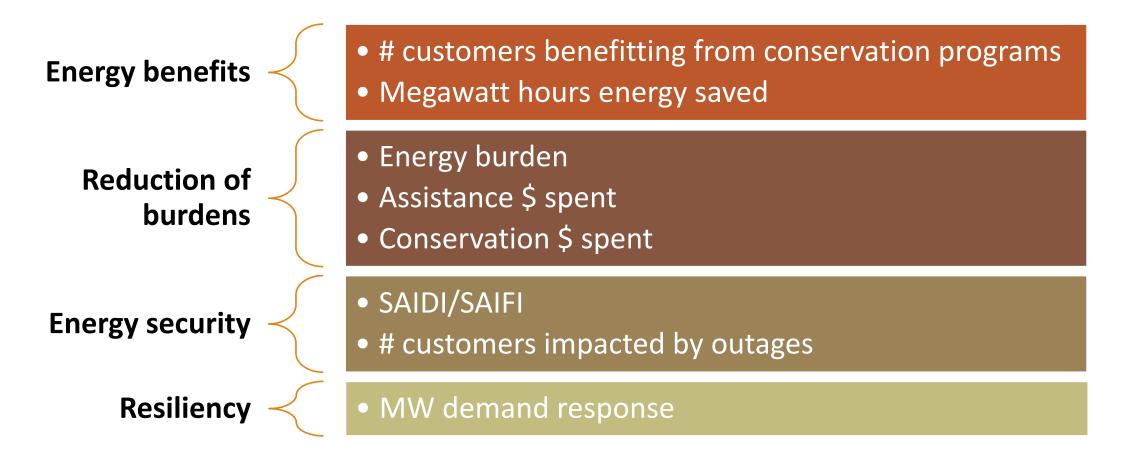

Measurable & mappable: The indicator can be measured using regionally accepted numbers processes & practices. We have the data to measure it and disaggregate it by census block group and/or census tract.

**Relevant:** The indicator can be directly and substantively impacted by resource acquisition actions, utility expenditures or other specific actions identified in our CEIP.

**Timely:** The indicator can be impacted within four years, and updated data are available to measure any change over four years.

Meaningful: The indicator is aligned with Tacoma Power's strategy and values and Tacoma Public Utility Board's Strategic Directives

### What indicators made our shortlist?

## **Brainstorm** Instructions

Share with us 1 indicator you would like included in Tacoma Power's CEIP!

A few things to consider:

| A few things to consider:                                    | <ul> <li># customers benefitting from</li> </ul>                       |
|--|--|
| Is it measurable or mappable?                                | Energy conservation programs   |
| Is it relevant?  | Megawatt hours energy saved  |
| Is it timely?  | Reduction of   |
| Is it meaningful?  | <ul> <li>Assistance \$ spent</li> <li>Conservation \$ spent</li> </ul> |
| Don't include Tacoma Power's draft                           | • Conservation 5 spent   |
| indicators   | Energy SAIDI/SAIFI   |
| <ul> <li>Only submit the 1 indicator you think is</li> </ul> | • # customers impacted by outages                                      |
| most important   |  |
|  | Resiliency < • MW demand response                                      |

## Mentimeter

If you could add one indicator, what would you add? (keep in mind is the indicator quantifiable or geographically mappable?)

Short answers are recommended. You have 250 characters left.
