

Call before you dig

Avoid damaging utility lines and costly repairs

If you plan to dig or excavate this summer, the law requires you to call us before you do any work. We will come to your location and mark our underground lines with paint for free. Avoid cutting into, and damaging utility lines could cost you a lot to repair.

Dial 811 or call 1-800-424-5555 to schedule an appointment a minimum of two days in advance.
