

Get a utility bill credit of up to \$600 for home EV charging

Whether you're thinking about buying an electric vehicle or own one already but charge with a Level 1, now is the time to install faster Level 2 charging at home. Consider taking advantage of one or more of these new offers:

- A **\$400** bill credit to buy and install a 240-volt outlet, Level 2 charger, or smart splitter
- A **\$600** maximum utility bill credit for installing two or more of the items above

Applying for the rebate and receiving a credit on your bill is easy. Even better, you don't have to own your home to be eligible, but, you, must be a Tacoma Power customer.
