MEETING DATE: October 28, 2020
DATE: October 15, 2020

SUMMARY: Tacoma Power requests approval by the Public Utility Board for two rate adjustments that would become effective on April 1, 2021, and April 1, 2022.

BACKGROUND: Tacoma Power’s revenue requirement analysis for the twenty-four month Rate Period (April 1, 2021 through March 31, 2023) requires a revenue increase of approximately $22.9 million. The utility has experienced general inflationary increases in operating and capital expenses such as personnel, assessments and technology upgrades. The proposed rate increases are designed to generate additional revenue to meet financial metrics (debt service coverage and liquidity) and avoid future rate shocks.

This proposal is in alignment with industry ratemaking standards and best practices, as well as the Public Utility Board’s Strategic Directives of Financial Sustainability (SD-2) and Rates (SD-3), and supports Tacoma Power’s Long-Range Financial Plan. Board Directive SD-3 notes that the utility “values planning gradual and consistent utility rate changes that are stable and predictable over the long term”. Board Directive SD-2 directs the utility to produce rate and financial plans that support an “AA-level bond rating, or better, to facilitate access to lower-cost financing and produce sustainable debt service expenses.

Tacoma Power needs to recover additional rate revenues of approximately $22.9 million over the April 1, 2021 to March 31, 2023 Rate Period through the proposed rate adjustments. System-wide average adjustments to Power rates are two increases of 2 percent in both 2021 and 2022. The class rate increases will not differ from the system-average increase; all classes are proposed to receive the same 2 percent rate increase.

In preparation for this request, Tacoma Power is seeking public input through virtual public presentations at Neighborhood Council and City Council meetings in communities served by Tacoma Power, as well as interested community organizations. Adoption of the rate proposal is scheduled for October 28, 2020. The first reading by the City Council is scheduled for November 17, 2020.

SUBJECT: Proposed Rate Ordinance – Amend and revise TMC Chapters 12.06 regarding Electric Rates
DATE: October 28, 2020

SUMMARY AND PURPOSE:
Tacoma Power requests approval by the City Council for two rate adjustments that would become effective on April 1, 2021, and April 1, 2022.

BACKGROUND:
This Department’s Recommendation is Based On: Tacoma Power’s revenue requirement analysis for the twenty-four month Rate Period (April 1, 2021 through March 31, 2023) requires a revenue increase of approximately $22.9 million. The utility has experienced general inflationary increases in operating and capital expenses such as personnel, assessments and technology upgrades. The proposed rate increases are designed to generate additional revenue to maintain financial metrics (debt service coverage and liquidity) and avoid future rate shocks.

This proposal is in alignment with industry ratemaking standards and best practices, as well as the Public Utility Board’s Strategic Directives of Financial Sustainability (SD-2) and Rates (SD-3), and supports Tacoma Power’s Long-Range Financial Plan. Board Directive SD-3 notes that the utility “values planning gradual and consistent utility rate changes that are stable and predictable over the long term”. Board Directive SD-2 directs the utility to produce rate and financial plans that support an “AA-level bond rating, or better, to facilitate access to lower-cost financing and produce sustainable debt service expenses.”

COMMUNITY ENGAGEMENT/ CUSTOMER RESEARCH:
In preparation for this request, Tacoma Power is seeking public input through virtual public presentations at Neighborhood Council and City Council meetings in communities served by Tacoma Power, as well as presentations or written material delivery to interested community organizations such as the Hilltop Action Coalition, the Black Collective, and the Korean Women’s Association.

Tacoma Power demographic analysis suggests that many of Tacoma Power’s customers are able to afford low, stable rate adjustments. However, there remain customers who are more negatively impacted by rate increases. Therefore, this proposal also includes increases to Tacoma Power’s low-income elderly and disabled (LIE/D) discount rate.

2025 STRATEGIC PRIORITIES:
Equity and Accessibility: (Mandatory)
Research on the existing beneficiaries of Tacoma Power’s assistance programs shows that most funds are spent in areas identified as having lower opportunities as measured on the City’s Equity Index. Increasing customer assistance will improve conditions in these areas.

Economy/Workforce: Equity Index Score: Moderate Opportunity
Increase positive public perception related to the Tacoma economy.

**Livability: Equity Index Score: Moderate Opportunity**
Increase positive public perception of safety and overall quality of life.

**Explain how your legislation will affect the selected indicator(s).**
Tacoma Power's mission is to provide safe, reliable electric service in an environmentally-responsible way. Reasonable, stable rate adjustments ensure Tacoma Power can continue to meet its mission for the long-term and ensure safety and quality of life for the community it serves. Adherence to the utility's financial plan prevents retail rate shocks and deterioration of services by ensuring Tacoma Power can maintain financial ratings in a capital-intensive industry.

**ALTERNATIVES:**
Presumably, your recommendation is not the only potential course of action; please discuss other alternatives or actions that City Council or staff could take. Please use table below.

These rate adjustments are included in the 2021/2022 Budget currently under consideration by the City Council.

Are there financial costs or other impacts of not implementing the legislation?
