SUMMARY: Tacoma Public Utilities requests authorization, pursuant to Chapter 39.34 RCW, the Interlocal Cooperation Act, to execute an interlocal agreement with the University of Washington-Tacoma (UWT), approximately \$182,022.28, which is 2/7th of the total contract amount of \$637,078.00, budgeted and shared across various departmental funds, to design, implement and manage an engineering pathways program in support of engineer careers for a five-year term.

In addition to this agreement with UWT, there is a companion contract with Degrees of Change that each department is participating in at various funding levels within their respective contracting authorities that do not require further TPU Board, C&A or City Council procurement approvals, and where the collaborating departments agree that Environmental Services will act as lead department signatory.

Tacoma Public Utilities, in collaboration with Environmental Services, Public Works, and Planning and Development Services, seeks Board approval to establish an Academic Fellowship with UWT to forge a new engineer pathway in support of local, diverse, and often first-generation college students obtaining engineering degrees. This legislation will benefit the City of Tacoma as a whole, along with the broader community by supporting the development and readiness of engineer students for future engineer careers.

BACKGROUND:

This recommendation is borne from the recommendations of former Mayor Marilyn Strickland (currently Congresswoman Strickland) and former Environmental Services Director Michael P. Slevin III, to develop a partnership with UWT to build an engineering pathway. When approached by former Director Slevin to join the partnership, Director Jackie Flowers agreed to sponsor this program. The pathway’s concept and design will help the organization open access and diversify the candidate pools for TPU jobs while supporting a pipeline of local talent into engineering careers in the community and Pierce County broadly.

This is in direct alignment with the Resolution No. 40622, supporting the Equity and Empowerment Initiative Framework of the City and the Board’s guiding principles and strategic objectives to

An additional and important objective is to have students return to the City of Tacoma, and more specifically Tacoma Public Utilities, as highly effective engineers further reflecting the diversity of the Tacoma community.

This agreement represents a cross-collaboration effort between Tacoma Public Utilities, Environmental Services, Public Works, and Planning and Development Services.

SUBJECT: Resolution – Interagency Agreement with the University of Washington-Tacoma – December 10, 2024
DATE: November 1, 2024

SUMMARY AND PURPOSE:

A resolution authorizing the execution of an interagency agreement with the University of Washington-Tacoma (UWT), for \$637,078.00, budgeted from various departmental funds, to design, implement and manage an engineering pathways program in support of engineer careers for a five-year term.

In addition to this agreement with UWT, there is a companion contract with Degrees of Change that each department is participating in at various funding levels within their respective contracting authorities that do not require further TPU Board, C&A or City Council procurement approvals, and where the collaborating departments agree that Environmental Services will act as lead department signatory.

BACKGROUND:

This Department’s Recommendation is Based On the recommendations of former Mayor Marilyn Strickland (currently Congresswoman Strickland) and former Environmental Services Director Michael P. Slevin III, to develop a partnership with UWT to build an engineering pathway. The pathway’s concept and design will help the organization open access and diversify the candidate pools for Tacoma jobs while supporting a pipeline of local talent into engineering careers in the community and Pierce County broadly.

This is in direct alignment with the Resolution No. 40622, supporting the Equity and Empowerment Initiative Framework of the City and the utility departments’ strategic objectives and guiding principles to become an anti-racist organization and to reflect the communities we serve through innovative workforce solutions and partnerships.

The overall objective of this agreement is to engage in targeted community-based outreach and relationship building for the recruitment of students into the program who live or attend school in the Tacoma-Pierce County area. The program will provide a comprehensive pathway for such underrepresented students interested in a career in engineering, to earn additional financial assistance in the form of stipends, and to gain scaffolded work experiences while earning their college degrees. An additional and important objective is to have students return to the City of Tacoma as highly effective engineers further reflecting the diversity of the Tacoma community.

This agreement represents a cross-collaboration effort between Environmental Services, Public Works, Planning and Development Services, and Tacoma Public Utilities.

COMMUNITY ENGAGEMENT/ CUSTOMER RESEARCH:

This agreement facilitates a planned pathway outlining consecutive opportunities for students to gain access and exposure to public service engineering jobs while becoming educated about the core services provided to our Tacoma community. This agreement is about local talent finding local jobs. It supports and strengthens partnerships

with local university, community colleges, and non-profit organizations with similar mission. The agreement supports our local educator partners in building strong career development skills in students and fosters the exchange of information between education and industry.

2025 STRATEGIC PRIORITIES:

Equity and Accessibility:

The Environmental Services Department, in collaboration with Public Works, Planning and Development Services, and Tacoma Public Utilities, seeks City Council approval to establish an Academic Fellowship with UWT to forge a new engineer pathway in support of local, diverse, and often first-generation college students obtaining engineering degrees. This legislation will benefit the City of Tacoma as a whole, along with the broader community by supporting the development and readiness of engineer students for future engineer careers.

Economy/Workforce: *Equity Index Score: Low Opportunity*

- Increase the availability of industry-specific education programs to support identified growth sectors.
- Increase positive public perception related to the Tacoma economy.

Education: *Equity Index Score: Moderate Opportunity*

- Increase the number of college students that find employment and remain in Tacoma after post-secondary completion.
- Increase the number of adults with post-secondary degrees or certifications.

Livability: *Equity Index Score: Low Opportunity*

- Improve access and proximity by residents to diverse income levels and race/ethnicity to community facilities, services, infrastructure, and employment

Explain how your legislation will affect the selected indicator(s).

Establishing the Academic Fellowship at UWT will result in positive influence to the local STEM-educated talent base in our community, and will move the needle toward achieving our goal to reflect the community we serve. The program supports first generation, local students who have come from economically marginalized areas; and directly supports student retention via the continuity of relationships between industry, students, and building community. We aim to keep the talent and future leaders local.

ALTERNATIVES:

Alternative(s)	Positive Impact(s)	Negative Impact(s)
Not approve the agreement with UWT	Other local employers may step forward to support this pathway saving the City some expense	Missed opportunity to forge a new STEM pathway and increase exposure and access to engineering careers and services at the City

EVALUATION AND FOLLOW UP:

An expectation for quarterly and annual reporting of UWT on the participation of students, program effectiveness including successes, anecdotes and testimonials, satisfaction and other potential indices or performance measures as outlined in the agreement that will support improvement efforts and provide review and monitoring of program completion rates and available aggregated demographic data.

STAFF/SPONSOR RECOMMENDATION:

Environmental Services, in collaboration with the other partnered City departments, recommend authorizing the execution of the interagency agreement with UWT to build an Academic Fellowship program that supports the forging of a new engineering pathway to City employment opening access and providing exposure, education and development opportunities to local, diverse, and often first-generation college students.

If the CONTRACTOR does over \$10,000 in business a year that is funded, paid or reimbursed with federal funds, CONTRACTOR will take specific and affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following:

- A. Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. This provision shall not apply to

- D. CONTRACTOR will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.
