Request for Proposals Specification No. PT25-0037F, Contract No. CW2278653 – January 14, 2026 Public Utility Board
DATE: November 24, 2025

RECOMMENDATION SUMMARY:

Tacoma Power recommends awarding a contract to Iljin Electric USA, Inc., Houston, TX, in the amount of \$7,710,000, plus applicable taxes, budgeted from the Tacoma Power Capital Budget, for purchase of one 230/115 kV, 300/400/500 MVA autotransformer.

BACKGROUND:

Southwest Substation is a major transmission facility supporting Tacoma Power's electrical grid. The proposed transformer is a key bulk power element supporting service in the central portion of Tacoma Power's service territory.

ISSUE: This purchase supports replacement of a critical substation transformer. This transformer's age and condition dictate a planned replacement to mitigate the impacts of an in-service failure. Lead times for design and manufacturing of power transformers of this size are approximately three years.

ALTERNATIVES: This critical piece of electrical infrastructure has a finite service life. The primary alternative considered by the department is the timing of replacement.

COMPETITIVE SOLICITATION:

Request for Proposals Specification No. PT25-0037F was opened September 30, 2025. 13 companies were invited to bid in addition to normal advertising of the project. Five submittals were received.
