RENEWABLE ENERGY FROM

**TACOMA POWER**  
TACOMA PUBLIC UTILITIES

# Enrollment Options

For a small additional monthly charge, Tacoma Power customers can match a portion of their electricity use with Renewable Energy Certificates (RECs). You can choose from a fixed monthly charge or a percent of your use that will vary monthly.

- Purchase 250 kWh blocks of RECs at \$3 each for your home or business
- Match any percent of your electricity use for only 1.2 cents per kWh

The average Tacoma Power home uses around 1,000 kWh of electricity per month, so \$3 per month would match 25% of your use with renewable energy.

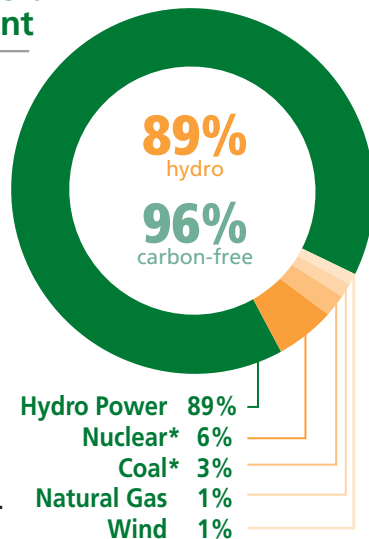

## Enroll online at [MyTPU.org/Evergreen](https://MyTPU.org/Evergreen)

**What Are RECs?** Renewable Energy Certificates (RECs) are generated from certified new wind resources and proceeds are applied to the development of new renewable resources in the Pacific Northwest. Learn more at [b-e-f.org](https://b-e-f.org)

## Offset Your Overall Carbon Footprint

Tacoma Power's electricity comes from 89% clean, renewable hydroelectricity and is 96% carbon free.

Our Evergreen Options program helps you lower your overall footprint beyond your electricity use.

Less than 1% can include other sources such as biomass, petroleum, and waste.

\*Represents a portion of the power Tacoma Power gets from the Bonneville Power Administration. Tacoma Power's Power Sources in 2015

NEW WAYS TO SAVE

# WE'VE GOT A REBATE FOR THAT.

Upgrade to a smart thermostat  
and get a \$50 rebate.

**Saving energy and money? Smart move.**

Smart thermostats not only look great—they help you save energy, which lowers your bills. And right now we're offering \$50 instant rebates to customers with an electric furnace or heat pump.
